Portfolio: [Zoha Sobhani](#)

Summary

Senior Product Designer with 5+ years of experience designing scalable digital products across telecom, e-commerce, logistics, and developer platforms. Specialized in simplifying complex workflows, building scalable design systems, and creating user-centered experiences through research, systems thinking, and scalable design practices.

Experiences

Senior Product Designer | Rightel

Iran, Tehran | Nov 2022 - Present

Telecom ecosystem delivering multi-platform digital experiences across web and mobile products.

- Built and scaled a cross-platform design system for web and mobile products, including reusable components, patterns, and documentation to improve consistency and design-to-development workflows.
- Reduced navigation complexity by consolidating 50+ navigation links into 5 primary navigation groups and 15 structured subcategories through a redesigned information architecture.
- Designed end-to-end product experiences across dashboard, package management, balance, and payment flows, using research insights, usability testing, and iterative design.
- Collaborated with Product Managers, Engineers, Researchers, and Data teams to deliver scalable solutions aligned with user needs, business goals, and technical constraints.

Senior Product Designer | Fake Store API

Iran, Tehran | Oct 2024 - Present

Open-source REST API platform for developers to prototype and test e-commerce applications.

- Led the redesign of a developer-focused platform, covering product discovery, UX research, information architecture, prototyping, and UI design.
- Synthesized user feedback, product analytics, and business requirements into intuitive user flows, wireframes, and high-fidelity designs that simplified the developer onboarding experience.
- Built a scalable design system with reusable components and design tokens, improving consistency and design-to-development collaboration.

UI/UX Designer | Calistu

Iran, Tehran | Jul 2021 - Sep 2022

E-commerce platform focused on creating digital shopping experiences and customer-facing products.

- Designed responsive e-commerce experiences, creating user flows, wireframes, prototypes, and high-fidelity interfaces focused on usability and customer journeys.
- Conducted usability testing and collaborated with cross-functional teams to refine product experiences.
- Improved customer journeys by identifying usability issues through user testing and iterative design refinements.

Enterprise logistics platform focused on streamlining operational workflows and business processes.

- Designed enterprise logistics workflows by simplifying complex operational processes and improving user interactions.
- Created reusable UI components and collaborated with engineers to deliver scalable product solutions.

Skills

Product Design & UX: Product Discovery, UX Strategy, User Research, User Journey Mapping, Information Architecture, User Flows, Wireframing, Interaction Design, Prototyping, Usability Testing, Responsive Design, Accessibility

Design Systems: Design System Architecture, Component Libraries, Design Tokens, Reusable Patterns, Documentation, Design QA, Design System Governance, Scalability, Consistency, Cross-platform Design Systems, Design-to-Development Workflow

Product Strategy & Collaboration: Product Thinking, Systems Thinking, Problem Solving, Cross-functional Collaboration, Working with Product Managers & Engineers, Design Handoff, Technical Feasibility, Agile Product Development

Tools: Figma, FigJam, Framer, ProtoPie, Rive, Miro, Adobe Photoshop, Adobe Illustrator, After Effects, Blender

AI & Emerging Tools: AI-assisted Research, AI-assisted Ideation, AI-assisted Prototyping, AI-assisted Documentation, ChatGPT, Claude, Gemini, Figma AI

Front-end & Technical Knowledge: HTML & CSS Fundamentals, Responsive Layouts, Component-based Development, Design-to-Code Collaboration

Education

Bachelor of Software Engineering - Shahrood University of Technology

Sep 2013 - Mar 2017

Voluntary Experiences

- Product Management training at Bozhan School, focused on product strategy, prioritization, and team collaboration.
- CS50X Iran training in Python and AI, strengthening technical and problem-solving skills.
- UI & Interaction Design training focused on advanced prototyping, motion, and Figma workflows.
